Chapter 450: The Creation of Elysium

A New Vision of Balance

Standing atop the Throne of Dominion, Sung Jin-Woo surveyed the vast multiverse, each realm a testament to his unyielding power and divine will. Under his dominion, creation flourished, order reigned, and justice was upheld. However, something was still missing — a place for souls who had lived righteous lives and fulfilled their mortal duties with kindness, bravery, and compassion.

While the Godverse stood as the pinnacle of divine power and authority, and the Netherworld now served as an eternal prison for the wicked, there was no sanctuary for the virtuous dead — no realm where noble souls could find peace and eternal joy after their time in mortal existence had passed.

Driven by this realization, Sung Jin-Woo resolved to create a paradise like no other, a vast universe that embodied tranquility, beauty, and boundless happiness.

The Birth of Elysium

With a wave of his Scepter of Dominion, Sung Jin-Woo summoned primordial energies from the core of existence itself. The void between the Godverse and the Heavenly Realm quaked as a new universe began to take shape—a luminous expanse filled with golden skies, ethereal landscapes, and shimmering rivers of light.

This universe, infused with Sung Jin-Woo’s divine essence, was vast and infinite, a place where the laws of suffering and decay did not exist. Time flowed differently within its borders, and every being who entered it found themselves untouched by pain or sorrow.

He named this new creation Elysium—a realm of eternal peace and joy, reserved for souls who had lived virtuous lives.

The Paradise of Eternal Joy

Elysium was a masterpiece of divine creation:

Golden Fields and Crystal Rivers: The landscape stretched endlessly, covered in golden meadows and crystal-clear rivers that sparkled under a perpetual dawn.

Celestial Gardens: Trees bore fruits of unimaginable sweetness, and flowers of every hue radiated a soft, calming light.

Eternal Homes: Each soul was granted a magnificent abode tailored to their heart’s desires, filled with treasures and comforts beyond mortal imagination.

Boundless Freedom: The inhabitants of Elysium could explore countless floating islands, celestial cities, and cosmic wonders.

Everything in Elysium existed to fulfill the desires of its inhabitants. There was no hunger, no sickness, and no strife.

The Resurrection of Good Souls

To ensure that no righteous being was left forgotten, Sung Jin-Woo established a divine decree:

"All creatures who have lived with honor, kindness, and selflessness shall find their way to Elysium upon death. Their souls shall be resurrected in this paradise, where they will be granted eternal life and happiness."

The decree echoed across the multiverse, touching every realm and dimension. Upon death, the souls of the righteous were enveloped in golden light and guided by celestial beings into Elysium, where they were reborn in their most ideal forms—free from the burdens of their mortal lives.

Here, they reunited with loved ones, fulfilled their dreams, and lived in eternal joy.

The Fate of the Wicked

However, for those who had lived their lives filled with cruelty, deceit, and malice, there would be no such reward.

Sung Jin-Woo’s decree continued:

"Those who have wrought harm and chaos upon creation shall not find peace. Their souls shall be resurrected and cast into the Netherworld, where they will face eternal punishment for their sins."

Upon death, the souls of the wicked were enveloped in shadow and dragged into the cold, dark expanse of the Netherworld Universe.

There, under the relentless watch of the dark archangel Amenadiel and his legion of dark angels, the condemned souls faced unending torment. Their punishment was tailored to their sins, a reflection of the pain they had inflicted on others during their mortal lives.

Amenadiel's Charge

In the desolate and forsaken Netherworld, Amenadiel stood tall, his black wings shimmering ominously under the dim, flickering light of the realm.

"Maintain order and justice among the damned," Sung Jin-Woo commanded him. "Let their suffering be a lesson etched across the fabric of existence—a warning to all who would choose darkness over light."

With unwavering resolve, Amenadiel and his dark angels oversaw the eternal torment of the wicked, ensuring that justice was served without mercy.

A Realm of Hope and Renewal

Elysium, on the other hand, became a beacon of hope for all living beings. The knowledge that virtuous deeds would lead to eternal paradise inspired countless creatures to live lives of kindness, compassion, and honor.

Celestial beings from the Heavenly Realm often visited Elysium, guiding and celebrating with its inhabitants. The realm resonated with laughter, music, and joy, a stark contrast to the cold, silent desolation of the Netherworld.

Sung Jin-Woo’s Final Blessing

As he gazed upon Elysium from his throne, Sung Jin-Woo spoke once more:

"This realm is my gift to those who have walked the path of righteousness. May it forever stand as a testament to the power of good and the promise of eternal peace."

Elysium glowed brighter in response, a living embodiment of divine love and grace.

Thus, the creation of Elysium marked a new era for the multiverse—a time when justice and compassion coexisted, ensuring that every soul, whether righteous or wicked, found their rightful place in the grand order of existence.

The multiverse thrived under Sung Jin-Woo’s divine rule, its harmony upheld by the balance between Elysium and the Netherworld.
